

EXECUTIVE PROFILE

Operator-technologist who makes complex work visible and builds mechanisms that connect manufacturing, quality, ERP workflows, machine signals, human judgment, and emerging technology. Experience spans high-reliability electronics, scaled operations, robotics, AI workflow design, root-cause practices, and cross-functional transformation. Direct SAP PM configuration and formal plant RCM depth remain explicit learning edges.

PROFESSIONAL EXPERIENCE

VAPE-JET | DIRECTOR OF OPERATIONS

2025-PRESENT

Software-enabled robotics, machine vision, manufacturing operations

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works in an environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DUDEWORTH | FOUNDER / AI & AUTOMATION ADVISOR

2017-PRESENT

Digital product framing, AI readiness, workflow architecture

- Develops AI-readiness frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, human judgment, escalation, decision records, evaluation, and governance rails.

AMAZON | OPERATIONS MANAGEMENT / SITE LEADER

2014-2018

Scaled 24/7 operations and operating mechanisms

- Led launch and execution for Amazon Prime Pittsburgh in an environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, Lean and Gemba mechanisms.

ROLE-ALIGNED
CAPABILITIES

Digital product vision, roadmap & backlog

High-reliability manufacturing

Root cause, standard work & control

ERP/Odoo workflow transformation

Machine-fleet telemetry feedback

Data-to-decision operating design

AI readiness, governance & adoption

Cross-functional change leadership

Lean, Gemba & Six Sigma

PRODUCT POINT OF VIEW

Asset data becomes valuable when it improves planning, execution, failure learning, materials decisions, and recurrence prevention.

AI should enter only when context, actionability, ownership, and human authority are explicit.

CREDENTIALS

- Google AI Essentials
- IBM Enterprise Design Thinking
- Six Sigma Certification
- OSHA 10

PROFESSIONAL EXPERIENCE, CONTINUED

COMPUNETICS | DIRECTOR OF OPERATIONS & ENGINEERING 2000-2013

Advanced electronics, high-reliability manufacturing, technical programs

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with DoD, CERN, Intel, and AMD; published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

CARDINAL BUILDING PRODUCTS | REGIONAL DIRECTOR 2021-2023

Distributed operations, CRM, fulfillment, logistics

- Built the company's first remote regional operation and modernized customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZEUSVU | CHIEF PILOT, AUTONOMOUS SYSTEMS 2018-2022

Regulated autonomous operations and field intelligence

- Led regulated drone operations with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.

ENVIRO SOCIAL CAPITAL | CHAIRMAN OF THE BOARD 2014-2017

Sustainable infrastructure and civic transformation

- Co-founded and led a public-private impact initiative and helped evaluate a \$200 million Social Impact Bond feasibility concept.

TECHNICAL TOOLKIT

Agentic AI | LLM workflows | RAG patterns | Human-in-the-loop design | Python | SQL | JavaScript | TensorFlow | Tableau | ERP/Odoo | Jira | Confluence | HubSpot | Slack | GIS

EDUCATION

UNIVERSITY OF PITTSBURGH

Bachelor of Science

Academic grounding includes materials science, physical chemistry, and biology-related studies.

PROFESSIONAL LEADERSHIP

IEEE | CMPT & EDS CHAPTER CHAIR

2012-2016

Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

TRANSFERABILITY

Direct strengths: operating mechanisms, high-reliability manufacturing, quality systems, root-cause discipline, ERP workflow transformation, machine-fleet feedback, AI product framing, and adoption.

Learning edge: direct SAP PM ownership and formal plant RCM tenure. Approach: pair with domain experts, learn the current model quickly, and make cross-system decisions more coherent.
